Details

The Gravityflo eyewash is ergonomically designed and barrier-free, the Gravityflo reservoir body is one-piece molded from light, durable, high-density polyethylene. It's bright blue color provides high visibility during an emergency. Unique, high efficiency spray heads of contoured rubber give thorough eye and face coverage. It is quick opening with a reliable valve with an easy-carry molded-in handle grip.

Gravityflo is ideally suited for use in a variety of locations such as industrial plants, laboratories, or at any site without a portable or permanent plumbed-in water source. It can also be used as a temporary back-up device for plumbed-in stations which are temporarily out of service. Additionally, this unit can be used for first aid while in transit to a hospital during emergency situations.

The Gravityflo eyewash is designed to exceed the ANSI recommended flow for a portable eyewash. The SE4000 makes emergency protection instantly available when required.

Caution:

This eyewash container should only be used with portable water and/or eyewash solutions intended for portable units.

Important

You must not rely on the information on this site as an alternative to medical advice from your medical physician or other qualified healthcare provider. Consult your healthcare provider immediately if you think that you may have a medical

emergency or for the diagnosis and treatment of injuries. Always seek the advice of your physician or other qualified healthcare provider before starting any new treatment or with any questions that you may have regarding a medical condition or injury.
