Details

Size: 7.5 x 3.8cm **Pricing Unit:** box/40 **Carton QTY:** 48 The AeroPlast™ Premium Weight Fabric Adhesive Bandage is a premium hard wearing dressing with our SupaBond™ extra strong adhesive and is recommended where a premium long wearing durable plaster is required.

AeroPlast™ VEND™

This invention brings unparalleled convenience to dispensing of plasters with ease for the user at no additional cost. AeroPlast™ VEND™ features a proprietary, perforated **rip off top** for ease of removal and a proprietary **vending spring** providing the ease of dispensing to the very last plaster.

SupaBond Adhesive

SupaBond™ adhesive, exclusively engineered for unrivalled adhesion, provides a secure adhesion across the site, preventing lift up or edge curling. SupaBond™ is also **latex free** and leaves **no sticky residue** as often associated with heavy duty fabric plasters.

SupaSorb™ Wound Pad

An SupaSorb™ wound pad provides **superior wound management** by draining blood or exudates into pockets in the wound pad. The Super absorbent wound pad minimises the number of dressing changes whilst protecting the wound

from further injury. SupaSorb™ leaves the wound site clean and comfortable, while the non-adherent film reduces the pain and site trauma when changing the dressing.

Conforming and Air Permeable Heavy Duty Fabric Backing

The AEROPLAST™ Premium Fabric dressing backing is particularly suited to heavy duty applications such as in the manufacturing industry with its super adhesion and **conformance to body contours**. AEROPLAST™ fabric dressings will keep the wound clean and comfortable through the toughest conditions.

Comprehensive Range of Sizes

There is an AEROPLAST™ Premium Fabric dressing **for any application** with specialized fingertip and knuckle dressings, large and small patches, standards and extra wide plasters. A wound can always be cared for by insisting on AEROPLAST™ Premium Fabric.

Contraindications / Precautions

Change dressing daily or more often according to the condition of the wound. As with all adhesive products apply and remove carefully from sensitive or fragile skin. Seek medical advice immediately for all serious wounds and burns. If redness or discomfort occurs, discontinue use and consult a physician.

This product is not a substitute for direct medical attention from a healthcare practitioner.
