The genuine rechargeable SurePower lithium-ion battery for the ZOLL AED Pro, with an onboard fuel gauge.

Details

The SurePower is ZOLL's genuine rechargeable lithium-ion battery for the AED Pro. Its onboard display shows remaining charge, and it pairs with the SurePower charger (we can quote the charger separately). It suits sites that cycle batteries rather than run on disposables.

Best for: AED Pro sites running a rechargeable battery program.

Includes one SurePower rechargeable battery. Compatible with the ZOLL AED Pro. Charger sold separately - ask us.
