Protect yourself & others with a St John Ambulance  
Faceshield Keyring

### Details

#### CPR Faceshield Keyring - St John

*Protect yourself and others!*

This CPR faceshield provides protection to both the rescuer and victim when CPR is used.

Faceshield helps prevent direct contact with mouth, nose and face and helps to stop possible contact with saliva or blood.

A faceshield can help overcome hesitation to start resuscitation.

St John's Faceshield Keyring is handily attached to a key ring so you can carry it around at all times and be ready in an emergency situation.

Small and compact, this keyring can go on your keys, bag, pocket, handbags and first aid kits.
