Details

In the case of a first aid emergency immediate action needs to be taken. Properly managing the situation can reduce the risk of damage to the casualty as well as ensure the safety of the first aider. Whether you're involved in work, leisure or sporting activities there is the risk of cardiac arrest, respiratory or physical damage and many other first aid emergencies. The St John CPR Chart provides a visual cue for the DRSACBD Action Plan, a vital resuscitation plan that is at the heart of every St John training course. The chart is large, easily identifiable and clearly outlines the action plan in simplified language to guide you through life saving resuscitation
