Details

If space and weight are your top priorities, this mini [first aid kit](#) is the one for you.

The SURVIVAL Compact First Aid KIT is small enough to fit in your day pack or attach to your belt, backpack or sports bag.

Leading first aid design

Designed by leading first aid experts to contain the essential first aid contents required for emergency situations, this little KIT can help you save a life.

In addition to its careful selection of essential items, this KIT contains CPR instructions to support your first aid training.

Quality first aid product

With a durable outer bag, and a handpicked selection of essential first aid contents, this innovative on-the-go trauma solution is water resistant, user friendly and invaluable in an emergency.

Weighing in at under 200 grams, the SURVIVAL Compact First Aid KIT is ideal for activities including cycling, mountain biking, hiking, mountaineering, caving or endurance races.

Personalise first aid on-the-go

In addition to its advanced colour-coded labelling system, this KIT offers a personal space section for you to include any additional items you may need, such as medications.

Be prepared for any emergency

Easy to place in school bags, sports bags and handbags, this compact first aid solution is a must-have to help you be prepared for any emergency situation.
