4 Test Kit Pack Contents: 4 x Test Devices, Instructions for Use, 4 x Extraction Tube, 4 x Blue Cap for Tube, 4 x Buffer Solution Bottle, 4 x Nasal Swab, 1 x Tube Rack and 4 x Disposal Bag

What is a Rapid Antigen Test?

Antigens are proteins that are part of the COVID-19 virus. If the test detects antigens in your nasal sample, it means that an active COVID-19 virus is present in your body.

IMPORTANT TO NOTE

- The COVID-19 antigen self-test may be supplied for self-testing in the home or other environment.
- Negative test results with COVID-19 antigen self-tests do not exclude infection with COVID-19 (so face masks, social distancing and good hygiene practice must be maintained).
- Positive test results on COVID-19 antigen self-tests or symptomatic persons require immediate confirmatory testing using a polymerase chain reaction (PCR) test.

A fast, easy, reliable test that provides results in 15 minutes at home. Available in different kit sizes to meet individual and family needs as well as workplaces and schools. The COVID-19 antigen self-test may be supplied for self-testing in the home or other environment.
