AeroLearn Placebo Inhaler

Details

The AEROlearn Placebo Inhaler from Aero Healthcare is a non-medicated inhaler designed to provide a medically accurate replication for product training and learning scenarios. Designed to provide asthma sufferers and other inhaler users with a training device to learn how to accurately use the inhaler before trying with a medicated device. For training purposes only, these products are proven to enhance simulation-based training and improve student retention. To use on training manikins only.

- Perfect for clinical training for patients new to inhalers.
- Train hand and breath coordination prior to using a medicated inhaler.
- Contains aerosol propellant, for training use only.
