- Strips are electromagnetically detectable
- Waterproof adhesive & sterile
- Specifically designed for the food industry
- Box of 50 strips

Details

Premium Adhesive Detectable Blue Strips

- First Aider's Choice detectable plastic strips are useful for food preparation, pharmaceutical, and manufacturing processing sites. The internal foil makes quick detection possible in plants that require metal detectable products. The non-stick pad contains metal foil underneath the pad and if lost it will trigger a pre-tested metal detector. The bright blue colour is highly visible making them easy to spot if they fall off. The strips are extra wide and made from a flexible fabric that is water resistant. Perfect for industries such as restaurants, hospitality, catering, cafeterias, pharmaceutical, and manufacturing.
