Ointment-based moisturiser with Ceramides to help relieve and hydrate cracked, dry skin without stinging.

Details

QV Dermcare Sting-Free Ointment is a water-free formula that helps relieve and hydrate cracked, dry skin without stinging. Formulated with ceramides EOP and NP to help support the skin barrier.

Benefits:

- 8 in 10 respondents agreed that the product moisturised their skin*.
- Ointment-based formula, won't sting when applied to cracked skin.
- Helps support the skin barrier.
- Up to 24-hour hydration.
- Contains ceramides EOP and NP.
- Suitable for use with eczema-prone skin.

- Free from fragrance, preservatives and colours.
- Australian made and owned.
- Dermatologically tested.
- From the makers of the No 1. selling skincare brand in Australia**

Directions:

Apply liberally where required on face and body, massage in gently. Use after bath and showering.

Tip - For best results, use in conjunction with QV Dermcare Eczema Daily Wash to gently cleanse mild to moderate eczema skin.

Cautions:

For external use only. Avoid eyes. If irritation occurs, wash the affected area and discontinue use.

Ingredients:

Paraffinium Liquidum, Petrolatum, Isopropyl Myristate, Polyethylene, Aluminium Starch Octenylsuccinate, Cetearyl Alcohol, Ozokerite, Silica, Dimethicone, Ceramide NP, Cholesterol, Carthamus Tinctorius (Safflower) Seed Oil, Ceramide EOP.

What is QV Dermcare Sting-Free Ointment?

QV Dermcare Sting-Free Ointment is a water-free, ceramide-enriched ointment that hydrates and soothes dry, cracked and eczema-prone skin for up to 24 hours — without stinging. It is fragrance-free, preservative-free and non-comedogenic.

What it is used for

- Very dry, cracked and eczema-prone skin
- Dry, cracked lips, hands and feet
- Soothing sensitive skin without the sting of water-based products

How to use

Apply liberally to the face and body as needed and massage in gently, ideally after a bath or shower. For eczema, pair with a gentle soap-free wash.

How it compares to a regular moisturiser

Unlike water-based creams that can sting broken or cracked skin, this water-free ointment forms an occlusive, ceramide-rich barrier that locks in moisture for up to 24 hours without stinging. That makes it well suited to flare-prone eczema, cracked heels and chapped hands where lighter lotions are uncomfortable. For gentler everyday hydration on less-dry skin, a lotion or cream may feel lighter.

Sting-Free Ointment FAQs

What is QV Sting-Free Ointment used for?

Hydrating and soothing very dry, cracked and eczema-prone skin without stinging, including lips, hands and feet.

Why does it not sting?

It is a water-free formula, so it soothes cracked and broken-feeling skin without the sting water-based products can cause.

What are ceramides?

Ceramides (NP and EOP) are natural components of the skin barrier that help support and repair it.

Is it fragrance free?

Yes — it is fragrance-free, preservative-free, colour-free and non-comedogenic.

How often should I apply it?

Apply as needed, ideally after bathing, for up to 24-hour hydration.
