Using SolvEasy Tinea Gel is a quick and easy way to treat athlete's foot. This effective formulation contains terbinafine hydrochloride 1% w/w which binds to the skin and continues to act for days after the last application, to help relieve itchiness while clearing the infection.

Details

Using SolvEasy Tinea Gel is a quick and easy way to treat athlete's foot. This effective formulation contains terbinafine hydrochloride 1% w/w which binds to the skin and continues to act for days after the last application, to help relieve itchiness while clearing the infection.

Benefits:

- Quick drying, non-greasy formula
- Low irritant formula free from preservatives and alcohol
- Lanolin-free gel base soothes and moisturises.

Directions:

Clean and dry the affected area thoroughly.

Apply SolvEasy Tinea Cream once daily, for 7 days, to the affected area and the surrounding skin.

If the infection is on the sole of your foot, use for 2 to 4 weeks.

The active ingredient in SolvEasy Tinea Cream remains in the skin and continues to fight infection for more than 7 days after application ceases.

Do not use soap as soap may further irritate your skin. Cleanse with a soap alternative.

The prescribed course of treatment should be finished to ensure the infection is completely cured and prevent it returning.

Cautions:

Avoid using soap based washes as soap may further irritate your skin.

Ingredients:

Terbinafine Hydrochloride 1% w/w
