Rid Low Irritant + Antiseptic Pump 100ml is a gentle, low-irritant insect repellent with added antiseptic action. Ideal for sensitive skin and safe to use on children 12 months and older. Repels mosquitoes, flies, sandflies and other biting insects for up to 6 hours.

Details

What is Rid Low Irritant + Antiseptic Pump 100ml?

Rid Low Irritant + Antiseptic is a gentle, sensitive-skin insect repellent in a convenient 100ml pump spray. The dual-action formula combines a low concentration of insect repellent with antiseptic protection, helping to soothe insect bites that

get past the repellent. Suitable for those with sensitive skin and safe on children aged 12 months and over.

Key benefits

- Repels mosquitoes, flies, sandflies, midges and biting insects for up to 6 hours.
- Antiseptic action helps protect bitten or scratched skin.
- Low-irritant formula gentle enough for sensitive skin.
- Safe for children 12 months and older.
- Pump spray applies evenly without aerosol propellants.

Active ingredients

- **Diethyltoluamide (DEET) 7%** - low-strength insect repellent.
- **Benzyl Alcohol** - antiseptic that helps protect skin.
- Aqueous, non-greasy base.

How to apply

Hold the bottle upright 15cm from skin. Pump and spread evenly over exposed skin, avoiding eyes, mouth and broken skin. Reapply after swimming, heavy perspiration, or every 4 to 6 hours as needed. For face, spray into hands first then wipe over the face avoiding the eye area.

Wash off when no longer required, especially before bed.

Warnings and precautions

- Not recommended for children under 12 months.
- Avoid spraying directly on the face - apply via hands.
- Keep away from eyes and mouth. If contact occurs, rinse thoroughly with water.
- Do not apply to broken or irritated skin.
- Store below 30 degrees Celsius away from open flame.

Frequently asked questions

How long does Rid Low Irritant repellent last?

Rid Low Irritant + Antiseptic provides up to 6 hours of protection against biting insects under normal conditions. In hot or humid weather, after swimming, or with heavy perspiration, reapply every 3 to 4 hours for continuous protection.

Is Rid Low Irritant safe for babies?

Rid Low Irritant is safe for children 12 months and older. For infants under 12 months, use physical barriers such as a mosquito net and clothing rather than chemical repellents. The 7% DEET concentration is the lowest in the Rid range, making it the gentlest option for young children.

Does Rid Low Irritant work on sandflies and midges?

Yes. The 7% DEET formula repels mosquitoes, sandflies, midges, biting flies and most other Australian biting insects. For severe sandfly or midge environments, choose a higher-strength repellent like Rid Tropical Strength.

What does the antiseptic do?

The benzyl alcohol component provides mild antiseptic action that helps protect skin where bites do occur, reducing the chance of infection from scratching. It also has a light cleansing effect, useful when reapplying repellent over previously bitten skin.
