Aerogard Roll-On Tropical Strength Insect Repellent 50ml provides long-lasting protection against mosquitoes, flies, sandflies, midges and biting insects. The mess-free roll-on applicator delivers precise coverage on arms, legs and exposed skin, perfect for travel, camping and tropical Australian conditions.

Details

What is Aerogard Tropical Roll-On 50ml?

Aerogard is Australia's best-known insect repellent brand, trusted for generations to keep mosquitoes, sandflies and biting insects at bay. Aerogard Tropical Roll-On 50ml is the compact, travel-friendly version of the tropical-strength formula. The mess-free roll-on applicator gives precise coverage without aerosol overspray, making it ideal for travel kits, school bags, glove boxes and pocket-sized emergency repellent.

Aerogard Tropical Strength benefits

- Repels mosquitoes, sandflies, midges, flies and biting insects.
- Tropical strength formula for high-risk environments.
- Up to 6 hours of protection per application.
- Mess-free roll-on applicator - no aerosol, no overspray.
- Compact 50ml travel size approved for cabin baggage.
- Suitable for adults and children over 12 months.

Aerogard active ingredients

- **Diethyltoluamide (DEET) 19% w/v** - tropical-strength insect repellent.
- Roll-on alcohol base evaporates quickly without greasy residue.
- No aerosol propellants.

When to use Aerogard insect repellent

- Tropical and subtropical travel - North Queensland, NT, Pacific Islands, South-East Asia.
- Camping, fishing, hiking and outdoor work.
- Evening barbecues and outdoor entertaining.
- Backyard activities in mosquito-heavy areas.
- School excursions, sports days and outdoor events.

How to apply

Twist or unscrew the cap. Roll directly onto exposed skin (arms, legs, neck) avoiding eyes, lips and broken skin. For face protection, apply to hands first then wipe onto cheeks and forehead. Reapply every 4 to 6 hours, after swimming, or with heavy perspiration.

Wash off when no longer required, especially before sleep.

Warnings and precautions

- Not for children under 12 months.
- Avoid eyes, lips and broken skin.
- Do not apply over sunscreen - apply sunscreen first, wait 15 minutes, then apply Aerogard.
- Wash hands after application.
- Store below 30 degrees Celsius away from heat sources.

Frequently asked questions

Does Aerogard repel sandflies and midges?

Yes. Aerogard Tropical Strength (19% DEET) repels mosquitoes, sandflies, midges, biting flies and most other Australian biting insects. For severe sandfly environments, reapply every 3 to 4 hours.

How long does Aerogard last?

Aerogard Tropical Strength provides up to 6 hours of insect protection per application under normal

conditions. Heat, humidity, sweating and swimming shorten the protection window - reapply every 3 to 4 hours in those conditions.

Is Aerogard safe for children?

Aerogard Tropical Strength is suitable for adults and children over 12 months. For infants under 12 months, use physical barriers such as a mosquito net. For toddlers, choose a lower-DEET formula like Rid Low Irritant.

Can I use Aerogard with sunscreen?

Yes, but always apply sunscreen first, wait 10 to 15 minutes, then apply Aerogard on top. Reapplying sunscreen over repellent reduces repellent effectiveness.
