Details

The Regulation Marine Scale G first aid kit contents only/refill pack.

The contents are as specified by the National Standard for Commercial Vessels 2008.

When determining the correct first aid kit for your survey ensure you address the following considerations:

H3.1 Medical Supplies Advice

Owners and operators should obtain medical advice from their consultant, medical practitioners or pharmacists in specifying medical supplies for their vessels, especially should they wish to add to the mandatory listings.

NOTE: The supplies and quantities are based on experience of the range of medical and surgical emergencies that can arise on board a vessel. However, they may need to be expanded in accordance with the particular risks inherent to the voyage, the length of the voyage, access to medical facilities, the cargoes carried and the number of persons on board.

The medical time period in which medical assistance can be obtained: 2 hours - Scale G, 6 hours - Scale F, 12 hours - Scale D and E.

Scheduled medicines not provided but are required in Scale G first aid kits:
