Details

The Eye Wash Station is designed as a secondary eye wash device and is intended for support use, not as a replacement for self contained or plumbed units.

The Eye Wash Station should be located in the immediate vicinity of employees working in a potentially hazardous area. It is used to deliver initial first aid while getting the person to a primary unit, or as extended aid when transporting a person from the primary eye wash unit to a medical facility.

Time is critical, the range of eye wash bottles have been designed to ensure that opening and commencement of flushing is achieved in optimal time. Just twist the top to break the seal and commence flushing.

Contents:

- Salinaax Emergency eye and skin wash station
- 2 x 944ml saline soft bottles
