Details

It is full flexibility of limbs on left side, right side has full flexibility of knee and hip with limited flexibility of elbow and shoulder.

The unique combination of muscle origins and insertions, the numbered bones, flexible ligaments and flexible spine with a slipped disc between the 3rd and 4th lumbar vertebrae clearly the show medical and anatomical interest of this top model's more than 600 structures.

It is made from a durable, unbreakable synthetic material. This is close to the realistic weight of around 200 bones. Final assembly carried out by hand. On a stable metal stand with 5 casters (painted white).

- Slipped disc between the 3rd and 4th lumbar vertebrae
- Protruding spinal nerves and vertebral arteries
- 3-part assembled skull with individually inserted teeth
