Leading first aid design and layout

Designed in Australia by leading first aid experts, the colour-coded labelling system enables you to clearly identify first aid contents and explains the typical use for each item. This makes it quicker and easier to respond to any emergency situation.

Easy refill and restock

The numbered labelling system tells you how many of each item you should have – alerting you to replacement requirements and making it clear when you need to refill and [Kit Refills from medibc](#)

Quality first aid product

The bag itself is coated 600D Oxford polyester, which is durable and water resistant. It's made with strong zippers and has double stitched handles. The outer KIT can be wiped down with disinfectant liquid.

The new and improved design for the SURVIVAL Home First Aid KIT also features the sophisticated MOLLE system for tailored attachment, new shoulder straps and redesigned zips that are sturdier than ever before, with an extra layer of material on the outside that protects both zips and the KIT's contents from the elements.

In addition to the extensive selection of first aid items, the KIT contains CPR instructions to support your first aid training in the case of an emergency.

Personalise your household first aid KIT

Inside your KIT, you will find a personal space section. It's a meshed area with a zipper that allows you to include specific items or additional first aid contents suitable for your individual household.

The improved KIT is also now bigger than ever, with an extra full mesh panel, as well as two new, deep pockets.
