Egoderm Cream is a gentle, corticosteroid free cream that helps to reduce inflammation and relieves irritation of common skin conditions such as dermatitis, eczema and shaving rashes.

Details

Egoderm Cream is a gentle, corticosteroid free cream that has been formulated to reduce inflammation and relieves irritation and symptoms of common skin conditions such as dermatitis, particularly of the face or hands, persistent eczema as well as, cosmetic or shaving rashes and it can be used as maintenance therapy for dry, scaly skin.

Benefits:

- Effectively relieves itch and inflammation.
- Moisturising base soothes and hydrates dry skin.
- Free of lanolin to reduce the chance of irritation.
- Suitable for adults, children and babies.

Directions:

1. Apply to affected skin 3 times daily or as needed. As soap may irritate, cleanse with QV Wash. If itching is severe, use Pinetarsol Bath Oil.
2. Persistent scaly, itchy skin: After 3 to 5 days very itchy, less inflamed skin may require EgoPsoryl TA.
3. When persistent scaly, itchy skin clears, continue using successful preparation less frequently for complete recovery of

underlying skin.

Cautions:

Always read the label. Follow the directions for use. If symptoms persist, talk to your healthcare professional.

Ingredients:

Active:

Ichthammol (Tumenol Ammonium) 1% w/w

Preservatives:

Methyl Hydroxybenzoate 0.25% w/w and Propyl Hydroxybenzoate 0.15% w/w
