Details

Chlorhexidine Irrigation Solution for cleansing and irrigating the skin or wounds, or to prepare for catheter insertion.

- Recommended as a pre-op skin antisepsis
- 70% alcohol is the most effective level as a disinfectant to penetrate the cell wall and kill 99.99% of germs
- Highly effective against a wide range of bacteria
- Use undiluted
- Apply to pre-cleaned skin using sterile applicator
- Leave for 2-5mins prior to incision
- Tinted pink non-staining

Important

You must not rely on the information on this site as an alternative to medical advice from your medical physician or other qualified healthcare provider. Consult your healthcare provider immediately if you think that you may have a medical emergency or for the diagnosis and treatment of injuries. Always seek the advice of your physician or other qualified healthcare provider before starting any new treatment or with any questions that you may have regarding a medical condition or injury.
