Details

Hotteeze Stick On Heat Pads (Pk 10) are great for the temporary relief of muscular aches and pains, period pain, or any time that the body feels cold. Unlike a wheat bag or hot water bottle which are bulky and visible, Hotteeze are discreet, portable and last a lot longer.

Adhesive heat pads are designed to be positioned on the outside of under garments where heat is required. Typical applications might be to the lower back or abdomen. The gentle adhesive will help keep them in position. For the most direct heat transfer, ensure that the clothing the heat pad is attached to is resting against the skin and not hanging loosely. To keep your hands warm, leave the adhesive cover in place and slip one into your pockets.

- Highest temperature: 63°C
- Average temperature: 53°C
- Duration: 12 hours above 40°C

How does Hotteeze Work?

Each Hotteeze pack contains iron powder and once opened, the iron ingredient oxidizes with the air creating heat, making Hotteeze the ultimate in comforting warmth. This simple reaction involves no electrical sources, batteries, burning, flames or toxic chemicals. The ingredients are completely natural, non-toxic, biodegradable and safe.

Benefits:

- Lasts 12 hours
- Self-adhesive
- Thin, comfortable and ultra light
- Odourless
