Finger Cots

Protect against infection!

Fingercots are a great alternative to full hand gloves when you have sustained small cuts or abrasions.

These nitrile latex free finger-cots (or finger condoms) are sulfur, chlorine and powder-free.

For your comfort and convenience these fingercots are pre-rolled and easy for you to put on.

With a textured finger-tip, these fingercots are perfect for precision trades such as jewellery manufacturing.

Fingercots are waterproof and are in a bright blue colour so that they can keep you safe.

Great also for industrial kitchens to keep bandages and plasters on.

Anti-Static and Power-free

Recommended: Single-Use

Contents:

1 box of 100
